THE HEXIS GROUP ANNOUNCE A MAJOR TECHNICAL PARTNERSHIP

HEXIS and Renault Sport Formula One Team have signed a technical partnership for the supply of self-adhesive vinyls that will support the French racing team in the implementation of **their graphic guidelines at racing venues and the company headquarters.**

This cooperation aims at showcasing technological self-adhesive films, made in France by HEXIS for Renault Sport Formula One Team, the only French car manufacturer involved in the Formula One World Championship.

TECHNICAL PARTNERSHIP WITH RENAULT SPORT FORMULA ONE TEAM

HEXIS will supply their coloured cutting plotter films as well as their digital print series so that Renault Sport Formula One Team, based in Enstone (UK), can efficiently respond to the constant need to update and produce liveries and signage and deliver them to 16 racing tracks in 5 continents. The agreement also covers the branding of the team's large fleet of logistics vehicles.

Thanks to the HEXIS network of converters and installers, Renault Sport Formula One Team will be able to implement branding changes with added flexibility and capacity. HEXIS will also develop a range of bespoke products for the team, adapted to the high specifications required by the Formula One environment.

A TECHNICAL PARTNERSHIP WITH THE RENAULT SITE OF VIRY-CHÂTILLON AND RENAULT SPORT

In order to align with the **new Renault corporate guidelines**, the site of **Viry-Châtillon** (France) was rebranded by HEXIS and their converting partners. This site is the home of racing engine development for Renault Sport Formula One Team and other teams powered by Renault.

HEXIS supply their products to Renault Sport and offer access to their network of independent and certified installers in order to produce the required wrappings.

EDAMS TECHNICAL PARTNERSHIP

Over the last 2 years, HEXIS provided Renault Edams (a French based Formula E Team) specific colours for their high-tech vehicles. Two blue colours were produced in order to match with the Renault Edams graphic charter. The next chapter under a Nissan technical partnership is set to continue.
